

M.P. POWER GENERATING COMPANY LIMITED

No.AS/MPPGCL/Tender/4405

/Jabalpur, Dated: 06/12/2010

C I R C U L A R

Sub:- Finalization of tenders.

In pursuance of procurement procedure in vogue, offers are being invited through open tenders issued from time to time. Offers are invited in three parts i.e. EMD, Techno-Commercial bid and Price bid. The EMD is opened first and after ascertaining the correctness of EMD amount as per tender condition or checking of documents for EMD exemption, as the case may be, the second part containing Techno- Commercial bid is opened. After due scrutiny and getting clarifications of Techno-Commercial bids, the price bids of only those bidders are opened whose offers are found technically / commercially acceptable.

It is observed that the above prescribed procedure is not being followed strictly. Recently, a case has come into the notice wherein, after opening of the price bid, offer of the lowest bidder was not found technically suitable and ultimately the tender was dropped.

In the three part tendering system, before price bid opening, proper scrutiny of technical & commercial offers is essential to avoid any unwanted situation which may lead to litigation also. It is therefore necessary that price bids of only those bidders should be opened, whose technical & commercial bids fulfill the requirements specified in the tender completely.

The compliance of above instruction be ensured strictly and all concerned be instructed accordingly. Any lapses noticed henceforth, shall be viewed very seriously and erring officers shall be exposing themselves for certain punishment.

BY ORDER

ADDITIONAL SECRETARY
MPPGCL: JABALPUR
